PRIESTLY PATRICK BASSEY

+234 806-715-6986   pbassey30@gmail.com   LinkedIn   GitHub

EDUCATION
───

Baze University   Feb. 2023 – Present
Master of Science in Computer Science   FCT Abuja

Gregory University   Sep. 2017 – Dec 2021
Bachelor of Science in Computer Science   Uturu, AB

EXPERIENCE
───

Freelance   Apr 2022 – Present
Word Press Dev, Frontend Dev, & Graphic Design   *Remote*

- Accumulated a diverse portfolio showcasing a range of WordPress projects, frontend interfaces, and graphic design creations. Demonstrated versatility in tackling projects across various industries and design aesthetics.
- As a WordPress Developer, engaged in creating and customizing websites for my Print on Demand Store (Quote la' chemise). Leveraged WordPress themes, templates, and plugins to craft visually appealing and functional websites that catered to users' needs.
- Applied strong graphic design skills to produce visually captivating assets, including logos, banners, and images, that enhanced website aesthetics and conveyed brand identity effectively.

Ministry of Health   Jan 2021 – Dec 2021
ICT technician, NYSC   *FCT Abuja*

- Provided direct knowledge and training on using Excel efficiently, improving staff members' skills.
- Played a crucial role in the pension office, aiding in the retirement process of over 100+ staff members.
- Worked closely with different departments to understand their technology needs and provide solutions.
- Collaborated with network administrators (Galaxy Backbone) to ensure a stable and secure network environment.

International Management and Finance Institute Academy   Feb 2020 – Aug 2020
Front-end Developer, Intern   *Akwa Ibom, Uyo*

- Collaborate with senior developers and designers to implement responsive and visually appealing user interfaces.
- Contribute to the creation of new features and functionalities on the frontend. https://www.imfiacademy.edu.ng/
- Ensure web applications are optimized for speed, performance, and accessibility.
- Gained experience in agile development methodologies and sprints.

PROJECTS
───

Personal Website: https://www.priestlyzipcode.com (for additional information and projects)

Hunt Amazon Finds | Node JS, React, Bootstrap, Vercel

- Engineered a dynamic web application called "Hunt Amazon Finds" by harnessing the power of Node.js, React, and Bootstrap. This application provided users with an interactive platform to explore curated Amazon products.
- Developed the application's architecture with scalability in mind, enabling "Hunt Amazon Finds" to accommodate increased user traffic and future feature expansions.
- Designed a responsive and visually engaging user interface using the Bootstrap framework. Implemented responsive design principles to ensure optimal display on devices of varying sizes.

Languages: TypeScript, JavaScript, Sass, HTML/CSS.

Developer Tools: Git, Cloudinary, Firebase, Vercel, MongoDB, WordPress.

Interests: Global Impact, Collaboration, User-Focused Creativity, Responsive Design, Basketball.

LEADERSHIP / EXTRACURRICULAR

Co-founded and facilitated workshops at the ACC – a student led STEM club at Gregory University
