

PRIESTLY PATRICK BASSEY

Frontend / Full-Stack Software Engineer | Founder & CEO, Priestly Acadia Synergy Ltd
+234 806-715-6986 | Pbassey30@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with hands-on experience building responsive, user-friendly web and mobile applications using React, React Native, TypeScript, and Node.js, alongside proven full-stack delivery on independent and business projects. Combines technical product-building experience — including consumer food-ordering platforms and business management systems — with entrepreneurial leadership as the Founder and CEO of a CAC-registered palm oil production and distribution company, where responsibilities span sourcing, distributor and retail relationships, logistics, pricing, and team supervision. Comfortable owning frontend architecture, API integration, and UI implementation end-to-end, with working full-stack coverage across Node.js, Express, MongoDB, and cloud deployment on Vercel.

CORE SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Sass

Frontend: React.js, React Native, Vite, Bootstrap, Responsive/UI Design

Backend: Node.js, Express.js, RESTful API Integration

Databases & Storage: MongoDB, Mongoose, Redis, Cloudinary

Tools & Platforms: Git, GitHub, Firebase, Vercel, WordPress, Socket.IO, JWT, Paystack, Nodemailer, Chart.js

Practices: Agile/Scrum, Performance Optimization, SEO Best Practices, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer — Ovena Technologies

2025 – Present

Remote | Food-ordering & delivery platform (ovenadelivery.com)

- Built the frontend for both applications on the Ovena platform: the customer-facing food-ordering app and the restaurant-facing management app, collaborating with senior developers and designers throughout.
- Developed core customer-app features including restaurant and menu browsing, food ordering, favorites, order history, search, location-based services, and payment flows.
- Built restaurant-app functionality including menu and meal listing management, order management, a restaurant dashboard, branch management, and staff assignment.
- Implemented reusable React Native components, custom hooks, and state management solutions to improve code maintainability and application performance.
- Integrated RESTful APIs and backend services, along with authentication, payment services, location services, and third-party APIs, to ensure seamless communication between the mobile application and server-side systems.

Founder & CEO — Priestly Acadia Synergy Ltd

Nov. 2024 – Present

CAC-registered palm oil production, distribution, and agricultural products company | Nigeria

- Lead sourcing of palm oil directly from mills and producers to supply the business.
- Manage relationships with distributors, retailers, and direct/wholesale customers to sustain consistent product distribution.
- Oversee logistics and delivery operations, including home delivery to customers.
- Set pricing based on prevailing market conditions, applying a competitive costing strategy to keep pricing favorable for customers.
- Supervise and motivate staff, fostering a team culture tied directly to daily business performance.
- Manage product packaging (sealed 1-litre and 75cl palm oil units) and brand marketing materials, including designing promotional banners.
- Handle business registration and compliance as a CAC-registered entity.

ICT Technician — Federal Ministry of Health

2021 – 2022

On-site

- Trained staff members on efficient use of Excel, improving day-to-day productivity.

- Supported the pension office in the retirement process for 100+ staff members.
- Worked with multiple departments to understand their technology needs and provide suitable solutions.
- Collaborated with network administrators (Galaxy Backbone) to help maintain a stable and secure network environment.

Software Engineer — IMFI Academy

Feb 2020 – Aug 2020

(International Management and Finance Institute Academy)

Part-Remote | Akwa Ibom, Uyo

- Collaborated with senior developers and designers to implement responsive, visually appealing user interfaces.
- Contributed to new features and functionality on the academy website's frontend.
- Helped ensure web applications were optimized for speed, performance, and accessibility.
- Gained hands-on experience with agile development methodologies and sprints.

PROJECTS

Priestly Acadia Synergy Ltd — Business Web Platform

Full-Stack Developer

Developed a full-stack business web application for Priestly Acadia Synergy Ltd, pairing a responsive React.js frontend with a Node.js/Express.js backend. Integrated MongoDB and Mongoose for data management, Redis for session handling and caching, Cloudinary for media storage, and Socket.IO for real-time communication. Implemented secure authentication and session management using JWT, bcrypt, cookies, and CSRF protection. Built interactive dashboards with data visualization (Chart.js), reporting, PDF generation, Excel/CSV export, email communication (Nodemailer), and file uploads, styled with responsive Bootstrap/Sass components.

Technologies: React.js, Vite, Bootstrap, Sass, Node.js, Express.js, MongoDB, Mongoose, Redis, Cloudinary, Socket.IO, JWT, Nodemailer, Axios, Chart.js, Vercel

priestlyarcadiasynergyltd.vercel.app

CWO – Abuja Archdiocese

Full-Stack Developer

Built the official website for CWO Abuja Archdiocese using React and Bootstrap, with an Express.js backend and secure online payments via Paystack. Implemented a Mass-booking feature allowing members to book for Mass online, with an admin tool to download the list of people booked for Mass on a given day. Delivered dynamic navigation and robust transaction handling to support community events and initiatives across devices.

Technologies: React.js, Bootstrap, Express.js, MongoDB, Cloudinary, Paystack, Nodemailer

cwoaa.vercel.app

Hunt Amazon Finds

Personal Project

Built a feature-rich web platform offering curated Amazon affiliate product exploration, with an application architecture designed to support high traffic and enable seamless feature expansion, and a responsive, visually rich UI adapted to any device.

Technologies: Node.js, React, Bootstrap, Vercel
